

Plasma Cutter PC 1500

The Plasma cutter PC 1500 allows the most cost efficient cutting for almost all metal sheets, especially for thin plate sheets. Solid design and high quality engineering guarantee the long life of the machine. Various modular components can be selected to match everybody's requirements. Additionally this machine comes with an all embracing HVAC fabrication software. The program includes libraries for rectangular, round and oval fittings as a standard as well as an integrated drawing program with an interface for importing DXF files.

- Compact design for heavy duty demands
- Integrated moving exhaust system
- Servo drive package - cambelt system
- HVAC software package

Technical Data

Working area	1.500 mm x 3.000 mm (other sizes on request)
Dimensions	4.150 mm x 2.300 mm x 1.420 mm
Plasma unit	40 A
max. cut	up to 12 mm
Positioning speed	max. 34 m/min.
Compressed air	250 l/min. with 7 bar
Power supply	2 x 400 V; 50 Hz, 3 Phases
Weight	1.400 kg
Control	CNC + Touch screen (Beckhoff) with remote access
